

Company History

In 1987 I started this business with just one employee (who is currently our Estimator) and myself working out of the back of two Iveco cube vans. Four months later we moved to a small two-story building in Souderton. In July 1989, we incorporated and two years later purchased property at 3430 Unionville Pike in Hatfield, and still serve the industrial community from this location with the outstanding talents God gave us.

Vision Statement

At K.M. Gehman, Inc., we are among the industry leaders in our capabilities to design, fabricate, and weld metal products. As an organization, we are committed to excellence in our products and service which provides exceptional value to our customers for the price they pay. Our strong work ethic and our commitment to customer satisfaction drives us to excel in all that we do. Our success is measured by the loyalty of our customers.

What our customers say about us:

"I have had many opportunities to work with individuals in your company, and am impressed. Knowing that your company employs people of high caliber, I have no doubt as to the service excellence we will enjoy from K.M. Gehman, Inc. in the years ahead!"

*William H. Rosson-Operations Manager
U.S. Tsubaki, Norristown, PA*

"Thank you so much for your help. We really appreciate the time and effort you took to correct our problem"

*George M. Jacob - President
Cutech, Inc., Hatfield, PA*

"I just wanted to express my sincere appreciation for the job you did. The response and quality of the finished product were outstanding. . .you have proven to be a very professional and competent (as well as very financially competitive) vendor."

Making Ideas Take Shape!

When it comes to *Customized Design, Fabrication, and Welding*, K.M. Gehman Inc. produces unparalleled quality results. From the drawing board to component or assembly installation, we differentiate ourselves from the rest by paying astute attention to the overall functionality and detail.

We are ideally positioned to handle your component or assembly production regardless of its unique characteristics. We have grown in size and scope over the past 14 years, serving a customer base ranging from the small machining firm to industry leaders with a variety of applications.

When considering a vendor whereby responsive turn-around time is critical on a custom piece, consider us your primary resource.

Service Offering

- **Customized Product & Process Design**

We specialize in making the idea take shape from the drawing board to the assembly line.

- **Welding Services**

Our welding services are offered both on and off-site, and include Stick, Mig, and Tig welding.

- **Customized Metal Fabrication**

We offer a full range of shearing, CNC punching, CNC bending, and plasma cutting, working with a full range of materials including aluminum, stainless steel, steel and brass, just to name a few.
